```javascript
const mySym = Symbol("key1")          //Symbol Declearation
//How to use symbol as key?

const JsUser1 = {
        [mySym]: "access object with key"
}

console.log(JsUser1[mySym]);          //access object with key
console.log(typeof JsUser1[mySym])

 Object.freeze(JsUser1)
```

```javascript
const course ={
    coursename: "js in hindi",
    price: "999",
    courseInstructor: "ajay"
}

// ********Object d-Structure*********************
console.log(course.courseInstructor) // ajay 1st way to access, correct Syntex

const {courseInstructor} = course
console.log(courseInstructor)            // ajay  2nd way to access,

const {courseInstructor: Instructor} = course   //3rd way to access
console.log(Instructor)
```
